

# Reducing Risk. Improving Performance.

## CAPITAL PROJECTS SYMPOSIUM

Register Today at [bit.ly/ElevateCPS](http://bit.ly/ElevateCPS)

### PROJECT PERFORMANCE & PRODUCTIVITY ARE LOW

**Over 85% of construction project owners exceed their original budget and schedule.**

**21% of those projects exceed their budgets by over 10%.**

The impact of inconsistent project performance introduces organizational risk as strategic business plans are built upon the assumptions of an on-time, on-budget delivery. Missing cost, schedule and quality objectives not only impacts the project budget, it exposes the organization to delayed revenue and erodes trust.

### INCREASED RISK REQUIRES CHANGE

Increasing project complexity and scarcity of skilled labor have pushed project risk to an all-time high. In a recent study on risk in construction, 75% of those who participated in the study experienced a claim or dispute in the last 5 years. A plethora of alternative project delivery methods have emerged but improvements in productivity and project performance benchmarks are still slow to come.

The Construction Industry Institute recently reported that lump-sum contracts experience a 35% – 88% higher productivity. Lean Construction and Integrated Project Delivery (IPD) are 3X more likely to complete ahead of schedule.

**What project delivery methods are right for your organization and how do you create the environment and culture to realize those benefits on your next project?**

### COLLABORATION & TRANSPARENCY MATTER

Case studies of successful projects demonstrate that improved collaboration across teams yields critical benefits such as reliability in overall project performance, reduction of construction costs, project schedule improvement and safety. Technology can play a vital role in enabling the team for success by boosting accountability and transparency. It also allows everyone to stay on the same page – a value essential to predictably successful projects.

## REGISTER TODAY!

Register for the Elevate: Capital Projects Symposium to engage in a dialog with your peers about reducing risk and improving performance of your next capital project.

### Who should attend:

- Leadership of capital projects from facility or asset owners seeking reduced risk and improved performance
- Finance professionals supporting capital projects seeking better visibility and predictability
- Capital project advisory professionals delivering strategic planning to owner executives

### By attending, you will receive:

- Gain insights from a panel of global experts in capital projects including; top owners, **Dodge Data**, **KPMG**, **Berkley Research Group** and more
- Build relationships with fellow leaders of capital projects in your industry
- Benchmark your projects alongside peers with an industry specific capital project performance benchmark report
- Take home practical strategies to improve your organization with the Capital Projects Survival Guide — an executive's guide for reducing risk and improving reliability of capital projects

## DATES & LOCATIONS

Each seminar location is tailored to place you among peers that deliver similar projects to yours. Expert panelists that have experience in your project types and delivery methods will be on hand that can speak to your specific needs. There is no other learning and networking opportunity like this anywhere.

<b>INFRASTRUCTURE</b> (Government, Transportation, Public Works, Water/Waste Water, Environmental)
Tuesday, May 23, 2017 – <b>New York, NY</b>
Tuesday, June 6, 2017 – <b>Los Angeles, CA</b>

<b>BUILDINGS</b> (Healthcare, Education, Commercial)
Thursday, May 25, 2017 – <b>Chicago, IL</b>
Thursday, June 8, 2017 – <b>Dallas, TX</b>
