Case Number	Release Note
00053037	The Edit Budget Details page loads more quickly when there are a large number of line items on the page.
00060148	The Comment box on the iPhone app is now larger to show more content.
00060290	In the Planning module, for draft capital plans, the table will now maintain sorting order after changes are applied.
00065619	In a particular circumstance, the report column "Amount Less Retainage" (Net Actuals Paid) will now factor in only retainage amounts that are applicable to paid items, eliminating inaccurate negative amounts.
00068590	When adding a Schedule Template, the creation date now reflects the user's time zone.
00068918	For process imports, an error no longer occurs if the functionality selected does not correspond to the selected data.
00069050	The Reports formula that calculates the difference between two dates no longer generates an error when used.
00069126	When overriding a workflow, the "Do not Notify" check box now work as expected for comment notifications as well.
00069201	Invoice item custom field column names will wrap if they exceed the fixed width of the grid columns.
00069214	Sorting values when editing process data fields now works as expected.
00069216	In particular circumstances, in the Cost module, a page error no longer occurs when line item descriptions span multiple lines and possibly include a paragraph mark.
00069231	In the Forms module, a java script error no longer occurs when a form has a long subject line.
00069312	In the Contacts module, date custom fields now save properly.
00069328	The 'welcome' message and the 'user name and password' message will now include all the appropriate information.
00069331	The Actual Costs page and others that have the project search drop-down list will now load more quickly.
00069360	Calendar event locations with spaces are no longer showing the escape characters instead of the space.
00069437	In a particular circumstance, when external users reply to multiple submittal package items at once, an error no longer occurs.
00069468	In the Reports module, directional icons now display within the visible area on machines with low resolutions running Internet Explorer 8.
00069470	Regardless of the .mpp file format (2003, 2007, 2010), the schedule will now import all of the tasks and display them properly.
00069508	On the Invoice Details page, an error no longer occurs when an item description includes quotation marks.
00069523	Marking a commitment invoice paid no longer causes a page error.
00069541	In particular circumstances, when taking action on a process instance, clicking Workflow Override will not cause an error.
00069597	When using Internet Explorer 7 or 8, the 'Add Note' tooltip now displays when attempting to reopen a submittal package.
00069604	When printing reports using Excel 2007, information will no longer be cut off at the top and/or bottom of each cell. The default font has been changed from Segoe UI to Arial to prevent this from happening.
00069724	On the Home tab calendar, the present date will now be highlighted in red.

00069849	In the Schedule module, selecting a date from the calendar will no longer cause the page to jump to the top.
00069853	In the Schedule module, there is no longer a scrolling lag when updating multiple tasks.
00069925	In a particular circumstance, creating a new submittal package will no longer create more than one package of the same name.
