Maintenance Release Notes

MARCH 22, 2019

Table of Contents

Resolved Cases

The following is a list of resolved cases for the past month. If you have any questions regarding this maintenance release, please contact e-Builder [Technical Support](#).

API

Case #	Resolution Notes
298974	An error prevented API logs from displaying the most recent results. This has been resolved.

Bidder Portal

Case #	Resolution Notes
303855	After a bid manager reopens a package per bidder request, the bidder could upload new documents, but they were not being displayed. All supporting documents are now displaying correctly prior to the bidder's re-submission.

Business Intelligence

Case #	Resolution Notes
296321	A progress photos BI report failed to filter or run correctly. This issue has now been resolved.
301810	The Process Age subcategory data type was incorrectly defined as string. This caused an error when trying to filter a process age for a report.
305066	An error was caused when users created two report folders with the same name on the same user account. This error has now been resolved. Going forward, users will not be able to create two or more report folders with the same name. If the user already has two or more report folders with the same name, these folders will need to be renamed.

Cost

Case #	Resolution Notes
291529	Previously, when a user takes an action when starting a process before the page was fully loaded, it could lead to various issues. Now, the request waits for the page to fully load before executing.
298702	Dynamic Cost Summary columns were not correctly processing budget changes with either a pending or projected status. This issue has been resolved to properly reflect dynamic cost columns with budget changes in the projected or pending status.
299314	Importing commitment invoices through a scheduled task of type "invoice" allowed violation of the cost control. This issue has been resolved.
305448	Previously, when a user attempted to add a note to a general invoice from the Invoice page, the note was not being saved. This issue has now been resolved. The notes are saved and display on the Notes tab for general invoices.

Dashboards

Case #	Resolution Notes
302534	There was an unnecessary exception handling when the report linked to the dashboard item doesn't exist anymore. This exception was causing an unnecessary error message, so the error message has been removed.
302418	The averages displayed in the dashboard gauges across projects were not weighted to consider the data set sizes in each project, causing a discrepancy to a linked report. The logic behind the gauges now uses a proper weighted average considering the sizes of each groups or data set per project.

Documents

Case #	Resolution Notes
293070	Updated the Redline tool to fix customer issues when opening selected files.
298832	Updated the Redline tool to fix customer issues when opening selected files.

| 302970 | Added the ability to filter folders by user permissions. |

| 303924 | Updated the Redline tool to fix customer issues when opening selected files. |

| 308969 | Fixed the issue with sub folders not being created when uploading folders with files. |

| 308682 | An error message is now displayed when reserved system files are selected for uploading. |

Notification Engine

Case #	Resolution Notes
290898	Email notifications were not consistently sent to new actors who were added to workflow step. All actors are now correctly notified that their comment or review has been requested.

Processes/ Workflow

Case #	Resolution Notes
292486	An issue was occurring in the e-Builder Gov Cloud instance preventing updates to a project name via a data field assignment. The issue was resolved.
293843	Previously, when importing multiple Commitment Invoice processes, issues could occur preventing all instances from moving to the next step. Now these failure reasons have been resolved.
301436	Resolved an issue with special characters causing mail merge fields from being uniquely identified.
305120	Resolved an issue with the dynamic grid history not being saved for instances saved as a draft before submitting.
305259	Fixed an issue where hyperlinks were not recognized in process string data fields.
305037	Previously, if an Actual Cost process was configured with "User Choice" checked for Type of Invoice (Commitment or General), when a user subsequently started the process and selected Commitment Invoice, they were not allowed to select the "This

is a retainage release" option.

Now, if a process is configured with "User Choice" checked, when a user starts the process and selects "Commitment Invoice", they will now have the option to select "This is a retainage release". If the user instead chooses "General Invoice", then the "This is a retainage release option" disappears as general invoices don't support retainage.

305773	An error was caused when a username containing an apostrophe was assigned to the Project Manager role. This has now been resolved.
306342	Resolved an issue where preceding or trailing spaces in the process counter column resulted in an error during import.

Reports

Case #	Resolution Notes
300892	Previously when running a schedule report with "Gantt View" selected, the % Complete for the project did not match the % Complete displayed on that project's Schedule page. Now the % Complete for the report matches the % Complete for the project schedule.
302772	When exporting to excel or CSV format, the report output is generated in a disorganized fashion. This issue has been resolved and the exported data is now correctly sorted when there are grouping settings.
304402	The time zone conversion of a report's date type columns are now ignored when they are custom field values. This is to resolve date custom field reporting issues.
304529	Resolved issues with the Gantt chart section of the schedule.
305105	The BI report with filter dates works as expected for custom fields. Added type definition for temp table custom field columns for proper filter application.
305107	BI Reports were incorrectly displayed "abended" report errors. The BI Reports are now populated properly with the results.
304849	Optimized the report query filtering on role permissions.

| 308023 | An error caused email values to be incorrectly displayed in the Address column of the report. This issue has now been resolved. |

| 299913 | An issue was encountered where the formula was failing because the "Left" or "Right" function was used in a report. Now, the formula will work as expected. |

| 308749 | A data field in the BI Report was truncating values incorrectly. This issue has now been resolved. |

| 308832 | The Date Modified field in reports was incorrectly displaying only the date instead of the date and time. This issue has now been resolved. |

Scheduled Task Engine

| Case #	Resolution Notes
296581	A project documentation integration process failed due to an issue on how the data was being retrieved. The information to be used over the period of the transaction was rearranged and optimized.
303978	Resolved an issue where the next scheduled time for a retry was not created and stored after a scheduled task failure.
304580	When using the e-Builder FTP parameters to pass the info for SFTP connections, it was not possible to specify the SftpKeyExchangeAlgorithm. Now, it is possible to force using one specific algorithm in case the default one fails.

Setup Admin

Case #	Resolution Notes
303473	Scheduled tasks failed due to an SQL query. Performance improvements were made to resolve this issue.

Your Opinion Matters

We rely on your feedback to better serve you. If you have ideas about improving our product or service, please don't hesitate to let us know. Below are four ways to reach us.

- **Like/Dislike** 👍 Like 👎 – Located in the banner of e-Builder Enterprise™ are like and dislike buttons. Click these to express your opinion of a particular page. This feedback is used to help prioritize upcoming product enhancements.
- **e-Builder Product Ideas** – The Product Ideas portal gives you a platform to share your thoughts on how to make e-Builder better. You can read and vote on the ideas of fellow e-Builder users or post your own. The number of votes is one of the factors considered when forming e-Builder's roadmap. To access the Product Ideas portal, click the arrow next to your username within the banner of e-Builder Enterprise, and then click Product Ideas.

- **Support** – Our Support staff is always available to meet your needs. To speak to a live customer service representative, call us within the U.S. at 888-288-5717 and outside of the U.S. at 800-580-9322, or email us at support@e-builder.net.
