Case Number	Release Note
00068638	When attempting to add comments to a closed submittal item, if the user does not have sufficient permissions to attach documents, the attach documents control will not be visible.
00069304	Long running reports will no longer timeout. If large amounts of data cannot be displayed by the browser then the report will need to be scheduled.
00070417	Workflow mail merge notifications will now have the correct link text in the email body.
00071553	When entering a PayApp invoice within a non Internet Explorer browser, the Invoice Item Custom Field columns (if present) will display in the proper format of the grid.
00072057	When managing processes and viewing where a process is being used, the issue that causes the grid to shift to the right has been removed.
00072110	Locked column cells in Cash Flow now display the correct values when updating Cash Flow. Also, footer values in IE8 and Chrome do not show "NAN.00" when updating cash flow anymore.
00072233	When using the text editor with MS Word-like controls within e-Builder Enterprise™, numbered lists will have different styles depending on their level.
00072887	In the Submittals module, users will be able to access all tabs in IE8 on a closed submittal.
00073026	When creating a formula for field assignments in the Processes module, using the Find function will now allow math operations with other numbers in the formula.
00073232	CC functionality is now available on static forms when filling out forms using the e-Builder mobile apps.
00073654	After creating a process data field with a default date in Setup/Processes area, the default date will be seen when creating an instance of that process.
00073959	When deleting a form type, if the form type is linked as a closed form of another form type an error message will be given that the form type cannot be deleted and the linked form types will be displayed in the error message.
00074031	When using the Plan Room feature of the Documents module and clicking a group check box to select all grouped items, the user is able to successfully download an archive of all grouped items.
00074133	The current payment due as certified in the merge document will now operate properly and will no longer double the amount of the current payment due in the pay application process.
00074255	When entering a new line item, the information entered will remain on the screen including when selecting other options on the screen.
00074262	When using the Processes module to enter commitment invoices that are applications for payment, if any item has funding that does not add up to 100% then an error is shown below the funding rule for that item.
00074273	In the Cost module, editing a budget without line items will no longer cause a page error.
00074372	When entering commitments and a validation error occurs when attempting to save, hovering the mouse over any of the items will not cause the Commitment Custom Fields section to be pushed down.

00074439	When viewing commitment item details, sorting by any column in any tab on the page will now behave properly when commitment item custom fields are enabled for the account.
00074465	Editing a commitment invoice for a payment application that has a status of 'received requesting approval' will no longer cause a page error.
00074523	When browsing the Plan Room folder in the Document module, the Plan Room Setup links appear as normal.
00074594	Adding a commitment change line item from the Processes module will no longer result in a page error if there are no line item custom fields defined and the functionality is enabled for the account.
00074798	When modifying existing processes using the dynamic cost line items control, changing the data no longer causes an error screen to appear.
00074840	When filtering for submittal packages or submittal items, users can now use the enter key to submit the filter.
00074912	When using the Processes module to enter commitment invoices that are not pay applications, the first two columns of the items grid will remain stationary during scrolling.
00074970	When printing the current view of cost type processes the funding rule name, if enabled, will be included in the grid.
00074995	When using the Processes module to enter line items into a dynamic cost process, the amount text boxes will now remain right aligned after the page refreshes.
00075042	MPP files can now be imported into a draft schedule template without error.
00075195	When using the Processes module to enter Dynamic Cost line items, deleting a row and saving no longer causes a Javascript error.
00075199	When using the Processes module to enter Dynamic Cost line items, adding rows, saving, the adding more rows and saving again will no longer cause errors.
00075280	The "Lookup" link now appears next to the Location text box when creating/editing a project issue.
