

## e-Builder 6.0 Upgrade

e-Builder 6 is the newest version of our project management and collaboration platform. It contains many new features, including a new user interface, redesigned to improve use and adoption.

To gain a complete understanding of the new features please register for one of the online sessions in early July using the links to the right.

Because e-Builder 6 represents a major change in the look of the system, the upgrade is not automatic. The decision to migrate to 6 is optional and the timing of the migration is entirely up to you. It can be anytime after July 1, 2007. Please contact your e-Builder administrator for information on what you will need to upgrade to e-Builder 6.

### New Features:

- Bid Distribution and Management Module
- Calendar Module with Outlook and PDA integration
- Contact Management Module
- Home Module - Personal events and tasks as well as access to all projects on one page.
- Integrated cost, schedule, and scope management modules.
- Off-line Transfer Management Tool for uploading and downloading files.
- New Xref capabilities for AutoCAD files.
- Graphical Dashboard Displays
- Project Planning Tools - Program and portfolio management capabilities
- View Filters - You can now organize groups of projects (e.g., by facility or campus) based on variables you define
- SAS 70 Type II Certification for Sarbanes-Oxley and Regulatory Compliance
- Completely configurable Excel reporting engine
- New administration features
- Template Merge - merge e-Builder data with your template documents (reports, contracts, and forms) in MS Word.
