Use of e-Builder can be easily achieved with a computer and a broadband internet connection. Performance is typically driven from the speed of your internet connection as we are a web-based product versus your computer hardware specifications. However, there is a recommended base minimum desktop standard to maintain optimal performance:

**Operating Systems:** Windows 8.1 or later & OS X v10.13 or later

**Supported Internet Browsers**
- Google Chrome™ v 80.0.1 or later
- Mozilla Firefox™ 74.0 or later
- Safari™ 13.04 or later
- Safari for iOS™ mobile v13.0 or later
- Other browsers: (e-Builder is available on these other browsers, but some features might not work as expected.) Microsoft Edge, Google Chrome™ for iOS, and Google Chrome™ for Android

*NOTE:* As of March 31, 2020, e-Builder will no longer support Internet Explorer.

**Screen Resolution:** The recommended screen resolution is 1280 x 1024 or higher. The minimum screen resolution required to support all e-Builder features is 1024 x 768. Lower screen resolutions do not always accurately display features such as Reports and Page Layouts.
